Dipanshu Sharma

Berlin, Germany | +4915123382340
dipanshusharma2510@gmail.com

Summary

Software Engineer with 8+ years of full stack experience building scalable, high-performance applications with TypeScript, Vue/React frontends and Node.js microservices on AWS and Kubernetes. Proven expertise in frontend architecture, payment and checkout systems, event-driven services, observability (Grafana, Prometheus, SLOs), CI/CD and automated testing, with strong ownership of technical decisions and close collaboration with product, design and cross-functional stakeholders.

Work profile

- https://github.com/meta-dipanshu-sharma

Skills

TypeScript, JavaScript, Vue (Vue 3, Nuxt), React (React.js, Next.js, Redux), Node.js, Fastify, NestJS, Express, GraphQL, Microfrontends, Microservices, Event-driven architecture (AWS SQS/SNS), PostgreSQL, Redis, MongoDB, MySQL, Elasticsearch, Commercetools, Talon.One, Contentstack, Payment lifecycle management (PSPs, BNPL), AWS (Lambda, S3, EC2, CloudWatch), Kubernetes, Docker, CI/CD, GitHub Actions, Grafana, Prometheus, Datadog, Jest, Vitest, Cypress, Playwright, Storybook, Material UI, Webpack, Vite, Optimizely, Figma, Claude Code

Experience

Kaufland e-commerce | Germany, Berlin
Software Developer | 01/2024 - 07/2026

- Own the checkout journey across a Nuxt/Vue 3 storefront and Fastify microservices, managing user order creation experience for 9 markets
- Delivered payment fee calculation into Tableau via an SQS/SNS event consumer, enabling finance to analyse PSP costs per transaction and market
- Audited checkout SLI/SLOs against production data and defined user journey-based SLIs and the checkout alerting roadmap
- Built Kubernetes cron jobs (floating-payment detection, expired-payment cancellation, Klarna authorisation extension) with Prometheus metrics and Grafana dashboards, reducing operations team manual effort by 70%
- Created a Claude Code skill that reconciles orders paid at the PSP but pending in Commercetools, turning a manual investigation into a one-step sync
- Shipped an Unzer instalments widget on product pages with a Redis-cached backend plans endpoint, giving shoppers transparent instalment plans

Cisco Webex | India, Bengaluru
Software Developer | 01/2022 - 12/2023

- Engineered core features and performance optimisations for the Webex Web JS SDK powering ~2.5M monthly meeting joins across third-party integrations
- Developed the Webex Web Calling Client and browser extension in React, reaching 2K+ downloads at launch
- Built real-time audio/video features on WebRTC, improving call stability under poor network conditions
- Shipped background noise removal and Full HD media for the Webex Web SDK 3.0 launch
- Maintained the "Kitchen Sink" demo apps that validate the SDK for the Webex Developer Portal

Coditas | India, Pune
Software Developer | 09/2020 - 01/2022

- Designed system architecture and database schemas for scalable CMS-driven healthcare applications
- Built a custom CMS with React, TypeScript and Material UI, establishing a reusable component library across modules
- Developed NestJS RESTful services with MongoDB aggregations, migrations and cron jobs for reporting workflows
- Integrated third-party health platforms and wearable APIs for secure real-time data sync

Metacube | India, Jaipur

Software Engineer | 07/2018 - 09/2020

- Developed GSM-Osprey, a digital marketing platform managing dealer assets and campaigns for a leading U.S. automotive marketer
- Built React/Redux frontend features and Node.js RESTful backend services
- Delivered serverless, event-driven solutions on AWS (API Gateway, Lambda, S3, SQS, Elasticsearch, CloudWatch)
- Designed automated background jobs with AWS Scheduler (cron-based workflows)

Education

Jaipur Engineering College And Research Centre | Jaipur, India
ECE, Bachelor's Degree (BTech)
2014-2018 | CGPA - 73.4%

Tagore International School | Jaipur, India
XII (High School)
2012-2014 | CGPA - 90%
