Dipanshu Sharma

Berlin, Germany | +4915123382340
dipanshusharma2510@gmail.com

Summary

Software Engineer with 7+ years of full stack experience designing and building scalable, high-performance frontends using JavaScript, TypeScript, and modern frameworks, with additional experience in Node.js based backend services and cloud environments. Proven expertise in frontend architecture, cloud-integrated applications, CI/CD pipelines, and automated testing, with strong ownership of technical decisions and close collaboration with UX/UI, architects, and cross-functional stakeholders.

Work profile

- https://github.com/meta-dipanshu-sharma

Skills

Typescript, JavaScript, React (React.js), Vue (Vue.js), Node (Node.js), NestJs, Redux, Next.js, Express (Express.js), GraphQL, Webpack, Vite, Microfrontends, Microservices, MongoDb, MySQL, Elasticsearch, Storybook, Material UI, AWS services (Lambda, Cloudwatch, EC2, S3), Jest, Vitest, Cypress, CI/CD, Github Actions, GIT, GitHub, GitLab, Datadog, Optimizely, Lokalise, Mopinion, Figma, Postman, AI Agent Integration (Langdock API), Copilot, Agile Methodology

Experience

Kaufland e-commerce | Germany, Berlin
Software Developer | 01/2024 - Present

- Owned and maintained a micro-frontend architecture across 4+ frontend repositories powering the Seller Portal Delivery & Return Experience, supporting feature development for multiple product squads
- Led the end-to-end Vue 2 → Vue 3 migration across 25+ components and shared libraries, resolving breaking changes and reducing bundle size by ~15%
- Engineered a TypeScript + GraphQL BFF layer orchestrating data across 6+ backend microservices, reducing frontend API complexity and improving data-fetch efficiency for high-traffic seller workflows
- Delivered high-impact product features including Returnless Refunds, Return Label Reselling, and OOH delivery with location-based filtering, driving a 22% adoption increase in the first month and lowering seller logistics costs
- Improved platform quality and compliance by implementing WCAG accessibility standards (covering 90%+ of key user flows), introducing Jest unit testing to reach ~85% coverage on critical UI modules, and enabling data-driven decisions through GA4, GTM, and Optimizely feature flag experimentation

Cisco Webex | India, Bengaluru
Software Developer | 01/2022 - 12/2023

- Engineered core features and performance optimizations for the Webex Web JavaScript SDK supporting ~2.5M monthly meeting joins and 100K+ calls across third-party integrations in telehealth, edtech, airlines, and retail platforms
- Developed the Webex Web Calling Client and browser extension (React), achieving 2K+ downloads at launch
- Built and enhanced real-time audio/video communication features using WebRTC APIs, improving call stability and media quality under varying network conditions
- Implemented background noise removal and Full HD media capabilities in the JS SDK, elevating call quality for high-definition conferencing scenarios with launch of Webex Web SDK 3.0
- Maintained and enhanced internal “Kitchen Sink” demo apps to validate Webex JS SDK functionality and support the Webex Developer Portal, the primary entry point for external developers

Coditas | India, Pune
Software Developer | 09/2020 - 01/2022

- Contributed to system architecture and database schema design for scalable CMS-driven healthcare applications
- Designed and developed a custom CMS using React (Hooks), TypeScript, and Material UI, establishing a reusable component-driven UI architecture across multiple modules

- Built and maintained RESTful backend services with NestJS (Node.js), leveraging MongoDB aggregations, migration scripts, and cron jobs to support dynamic data workflows and reporting
- Integrated third-party health platforms and wearable device APIs for secure real-time data synchronization, while actively driving technical planning, estimations, and sprint delivery in an agile environment

Metacube | India, Jaipur
Software Engineer | 07/2018 - 09/2020

- Contributed to the development of GSM-Osprey, a core digital marketing platform for a leading U.S.-based automotive marketing company, managing the full lifecycle of dealer assets and campaign workflows
- Developed frontend features using React.js (functional, stateful, and higher-order components) with Redux for state management
- Built and maintained backend APIs and business logic using Node.js, designing scalable RESTful services
- Worked with serverless architecture on AWS, utilizing API Gateway, Lambda, S3, SQS, Elasticsearch, CloudWatch, IAM, and EC2 to build distributed, event-driven solutions
- Designed and scheduled automated background jobs using AWS Scheduler (cron-based workflows)

Education

Jaipur Engineering College And Research Centre | Jaipur, India
ECE, Bachelor's Degree (BTech)
2014-2018 | CGPA - 73.4%

Tagore International School | Jaipur, India
XII (High School)
2012-2014 | CGPA - 90%
